Re: Comments on Proposed PSD permit and construction extension request for HEC  
State of South Dakota

Dear Mr. Rombough,

In response to your recent public notice relative to DENR's proposed new PSD permit and construction deadline extension, we cannot properly publicly review such without all the proper information being made available at this time and hereby request an extension of the comment period so that we actually have 30 days to review all the materials submitted by Hyperion and then comment to your office.

We can make only the following comments at this time due to the insufficient amount of information being made available to the public at this time:

1. The PSD permit should not be issued at this time since the application is still incomplete and all the information made available to your office is not available for us to review and comment.
2. BACT has not been properly completed for the GHG reviews.
3. A time extension should not be granted at this time and the previous permit should be declared null and void.
4. Hyperion should be made to completely reapply for a PSD permit with a complete and transparent application accompanied with a properly completed EIS.

In summary, if we must comment now we would ask that neither the Permit nor the time extension be allowed.

Sincerely,

*Florence Williams*
