

## DENR's Timeline for Developing South Dakota's 111(d) Plan while awaiting outcomes of Lawsuits against EPA

**Mission** – DENR's first priority will be to provide whatever technical support is needed by Attorney General Marty Jackley and his Office to enhance the odds of winning the lawsuits against EPA's Clean Power Plan. While we await those outcomes, DENR will work with stakeholders (PUC, other state agencies, other states, EPA, multistate organizations, regional transmission organizations (RTOs)/independent transmission organizations (ISOs), utilities, cooperatives, environmental groups, public, businesses, etc.) as appropriate to develop first, a two-year extension request to be submitted to EPA by September 6, 2016, and then a 111(d) plan by September 6, 2018, that continues to make reliable and affordable power available to South Dakotans.
