

## Renewal of SOC Susceptibility Waiver

\_\_\_\_\_ water system is applying to renew the synthetic organic chemical (SOC) "susceptibility" waiver for the 2017-2019 compliance period. We have on file with the Department of Environment and Natural Resources (DENR) the following:

1. Hydrological data indicating that our water sources are not vulnerable to SOC contamination for the purposes of obtaining a waiver.
2. A well log or "as built" well plan indicating that each of our water sources is properly constructed.
3. Documentation indicating no submersible pumps are present at this water system or that our submersible pumps do not contain non-food grade oil or a PCB filled capacitor.
4. If any SOC samples have been taken, all results were "no detect".

**Nitrate Samples - A copy of each nitrate sample taken after January 1, 2014 for each entry point noted below must be attached to this application. Nitrate samples are taken annually.** Nitrate samples must not exceed 5.0 mg/l.

We request a renewal of the waiver to cover the following entry point(s) of water:

Entry Point Name	Year Built
_____	_____
_____	_____
_____	_____
_____	_____

All of the above information is accurate at this time for our water system.

Signature	Date	EPA ID #
-----------	------	----------

Title	Phone Number
-------	--------------

Address	City, State, Zip
---------	------------------

Please submit to: Rob Kittay, SD Drinking Water Program, 523 E Capitol, Pierre SD 57501 or fax to 605-773-5286 or email to [rob.kittay@state.sd.us](mailto:rob.kittay@state.sd.us)
