

Emergency Planning for Farmers & Ranchers Voluntary Chemical Storage Report

When a fire or other emergency situation occurs at your farm or ranch, you may be injured or you may not be home. For this reason, it is important that the local fire department knows if you have hazardous chemicals and where they are stored. They can use the information you provide to protect you, your family, their personnel, and your livestock from hazardous fumes or explosive situations. The State Emergency Response Commission has prepared this form as an easy way for you to provide this information to emergency responders. Please complete the form and return it to the State Emergency Response Commission at PMB 2020, State Emergency Response Commission – DENR, 523 East Capitol Avenue, Pierre, South Dakota 57501-3182. We will forward copies of the form to your local fire department and to your Local Emergency Planning Committee. Should you have any questions, feel free to call (800) 433-2288.

Farm Name: _____

Owner/Operator: _____

Mailing Address: _____
Street or Post Office Box City State Zip Code

Farm Actual Location: _____
Actual location street address or driving directions Nearest Town

Emergency Contact Information: _____
Contact # 1 Name Telephone (home) Telephone (work or cell)

_____ Contact # 2 Name Telephone (home) Telephone (work or cell)

Local Fire Department _____
(department that would respond to incidents at your farm/ranch)

The hazard posed by each chemical is different. For example during a fire, gasoline poses an explosive hazard whereas insecticide pellets pose a fume/inhalation hazard. For this reason, a fire department needs to know the different kinds of chemical that you store. Please indicate all the types of chemical you store at your farm or ranch. *Attach additional pages if necessary*

Chemical name	Maximum stored at any time	Months when Chemical is stored on-site	Where chemical is stored (reference your map)

Please make a sketch of your farmstead.

Try to make your sketch easy to understand for fire department personnel. Consider what they will need to see on this map, if they need to respond to a fire or emergency at your farm, and you are injured or if nobody is home when they arrive. Indicate the location of your driveway, house, silos, pens for livestock, gates, fuel tanks, fertilizer tanks, and any buildings where agricultural chemicals are stored. Put names on buildings if you have certain names for certain buildings.
