INSTRUCTIONS	
Please <u>type or print in ink</u> all items. This form must be completed for each location containing aboveground storage tanks. If more than five (5) tanks are owned at this location, photocopy the following sheets, and staple continuation sheets to the form.	

GENERAL INFORMATION

Notification is required by State law for all aboveground stationary tanks that have been used to store regulated substances*

The information requested is required by Chapter 74:56:03 of the Administrative Rules of South Dakota (ARSD).

The primary purpose of this notification program is to locate and evaluate aboveground stationary tanks that store or have stored petroleum or hazardous substances. It is expected that the information you provide will be based on reasonably available records, or in the absence of such records, your knowledge, belief, or recollection.

Who Must Notify? Chapter 74:56:03 of the Administrative Rules of South Dakota requires that, unless exempted, owners of aboveground stationary tanks that store regulated substances must notify designated State or local agencies of the existence of their tanks. Owner means--

(a) **in the case of an aboveground stationary storage tank in use on November 30, 1987, or brought into use after that date, any person who owns an aboveground stationary storage tank used for storage, use, or dispensing of regulated substances, and**

(b) **in the case of any aboveground stationary storage tank in use before November 30, 1987, but no longer in use on that date, any person who owned such tank immediately before discontinuation of its use.**

What Tanks Are Included? Aboveground stationary storage tanks defined as ASTs which do not move, such as tanks fixed permanently in place on foundations, racks, cradles or stilts, or on the ground. The term does not include tanks mounted on wheels, trolleys, skids, pallets, or rollers and vessels such as a 55-gallon drum or smaller vessels or produced substance storage tanks directly related to oil and gas production and gathering operations or tanks located within a building structure meeting requirements in Chapter 74:56:03:11. An aboveground storage tank system is defined as "an aboveground storage tank or combination of ASTs, including connected piping".

What Tanks Are Excluded? Tanks excluded from notification are:

- farm or residential tanks used for storing motor fuel for noncommercial purposes;
- tanks used for storing heating oil or motor fuels for consumptive use on the premises where stored;
- septic tanks;
- pipeline facilities (including gathering lines) regulated under the Natural Gas Pipeline Safety Act of 1968, or the Hazardous Liquid Pipeline Safety Act of 1979, or which is an intrastate pipeline facility regulated under State laws;
- surface impoundments, pits, ponds, or lagoons;
- storm water or waste water collection systems;
- flow-through process tanks;
- liquid traps or associated gathering lines directly related to oil or gas production and gathering operations;
- storage tanks situated in an underground area (such as a basement, cellar, mineworking, drift, shaft, or tunnel) if the storage tank is situated upon or above the surface floor;
- pipes connected to any tank which is exempt;
- tanks used for storing pesticides regulated under the SD Codified Law Chapter 38-21, except those regulated pursuant to subtitle I of the Federal Hazardous and Solid Waste amendments of 1984.

What Substances Are Covered? This includes any substance defined as hazardous in Section 101 (14) of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), with the exception of those substances regulated as hazardous waste under Subtitle C of Resource Conservation and Recovery Act (RCRA). It also includes petroleum, e.g., crude oil or any fraction thereof which is liquid at standard conditions of temperature and pressure (60 degrees Fahrenheit and 14.7 pounds per square inch absolute).

Where To Notify? Send completed forms to:
