**Re: Certification of Applicant – Disclosure of Mineral Mountain Resources (MMR)  
Standby Project, Rochford, SD**

Dear Ms. Hudson,

This will serve as the amendment to the Notice of Intent to Conduct a Mineral Exploration Operation submitted on April 19, 2017 for MMR. The SD DENR requests that MMR disclose any violations of environmental laws.

MMR was issued a Notice of Violation (NOV) dated March 22, 2013 under EXNI-418 for an unauthorized discharge of drilling fluids into Battle Creek. The release occurred as a result of leakage of the drilling fluids from a mud pit of the drilling activities. The primary material was bentonite mixed with water and resulted in discoloration of a small portion of the stream. The release was immediately noticed, operations were halted, state officials were notified, and a remedial action plan was submitted. Subsequently the material was cleaned up from the stream without adverse impact. The SD DENR issued the NOV and the fine was paid by the company. Drilling operations were reviewed and procedural changes were made to prevent future events of this nature.

Sincerely,

**FMG Inc.,**

Emily Fisher, P.E.
