3)			Name of the Control o					
Describe Proposed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any								
proposed work). Use additional page(s) if appropriate.								
The Gordon Federal 44-11H is a horizontal Red River "B" well with a SHL located at 150' FSL and 1000' FEL of Sec 11 T21N R3E, Harding								
Co., S. Dakota. The well will be drilled vertically, approximately to the top of the Silurian Interlake formation. From this point, an 8 3/4" hole at 12 degrees/100 ft BUR will be drilled to the north at an azimuth of 0 degrees, through which the 7" casing will be set								
approximately at the top of the Red River "B" porosity zone. The lateral will then be drilled to a BHL of 530' FNL & 1000' FEL of Sec 2								
T21N R3E. Estimated date to begin dirt work is 11/17/2014.								
Pit Liner Specifications: A 12-mil plastic liner will be used to line the cuttings pit during drilling operations.								
I hereby certify that the foregoing as to any work or operation performed is a true and correct report of such work or operation.								
Terry L. Olson Reg. Compliance Specialist 9/17/2014

PERMIT CONDITIONS

CRI: Gordon Federal 44-11H 21N-3E-11 SESE, Harding County Permit: #2058 API: 40 063 20770

Approval has been granted to drill this location as detailed on the attached Application for Permit to Drill (Form #2) with the following additional conditions:

- 1. This permit is conditioned on compliance with all applicable requirements of South Dakota Codified Laws 45-9 and Administrative Rules of South Dakota 74-12.
- 2. A 12-mil woven, reinforced high-density polyethylene liner must be used on all pits.
- 3. If drilling does not commence within one year from the issuance date, this permit will expire.
- 4. Surface runoff must be diverted around the drill site.
- 5. The surface hole must be drilled with fresh water.
- 6. Cement must be circulated to the ground surface on the surface casing.
- 7. If horizontally drilled:
 - A. The coordinates of the production casing shoe and the well terminus must be filed with the department.
 - B. The azimuth of the horizontal segment of the well must be filed with the department along with the results of periodic down hole surveys.
- 8. If production casing (long string) is set:
 - A. The cement program submitted with the application shall be followed.
 - B. A cement bond log must be run and filed with the department within 60 days after completion of the well as required by Administrative Rules of South Dakota 74:12:02:12.
- 9. If abandoned, a plugging plan must be submitted to the department for review and approval. The plugging plan should address all requirements found in Administrative Rules of South Dakota 74:12:03.
 - A. If production casing is left in the wellbore, a mechanical integrity test must be conducted to verify the integrity of the casing as required by rule 74:12:03:02(4)(b)(ii).
 - B. The casing string must be cut off at least three feet below the final ground surface contour. A plate with the name of the operator, well name and number, and legal location by quarter-quarter section, township and range must be welded to the casing stub. The location of the abandoned well must be surveyed with high resolution global positioning system equipment or other appropriate survey methods sufficient to accurately locate the well. Survey coordinates must be included in the final abandonment report.
- 10. Surface reclamation of the site must be completed within one year of plugging and abandoning the well.
- 11. Interim reclamation must be conducted on all areas disturbed by a well drilling operation and not needed for production operations within 12 months after the well is completed in accordance with Administrative Rules of South Dakota 74:12:03:07.

12. A washed set of sample cuttings (or cores, if cut) must be shipped, free of charge, to:

Derric Iles Geological Survey Program Akeley-Lawrence Science Center University of South Dakota 414 E. Clark Street Vermillion, SD 57069-2390

13. Please notify this office prior to plugging or MIT so a witness can be on location. If plugging or MIT will occur after regular business hours, call Jeff Klenner at (605) 929-1414.
