

**Department of Environment and Natural Resources
Application for
On-site Wastewater System Installer Certification**

South Dakota has installation requirements for onsite wastewater systems. These design requirements ensure that wastewater discharged into these systems is treated properly and will not pose a risk to human health or the environment. South Dakota's regulations for onsite wastewater systems are found in the Administrative Rules of South Dakota (ARSD), Chapter 74:53:01.

Septic Tank Installer Certification

In order to install septic tanks in South Dakota, a person needs to be certified. This certification program ensures that persons installing septic systems understand the design requirements. If you wish to become a certified installer, please complete the following information and submit it to DENR. You will be provided a certification test. A score of 70% or higher is needed to become a certified installer.

First Name: _____ Last Name: _____

Business: _____

Address: _____

City: _____ State: _____ Zip: _____
