DEPARTMENT OF ENVIRONMENT AND NATURAL RESOURCES
TRANSFER OF PERMIT COVERAGE FORM
for Coverage Under the SWD General Permit for
Storm Water Discharges Associated with Construction Activities

This form is required to be submitted when ownership of a construction project or an individual lot in a larger common plan of development has been transferred to a different owner. Please submit this form to the following address:

Project Name: ____________________________  Permit Number: ____________________________

Site (Lot) Legal Location: ____________________________________________________________

Site (Lot) Description: ______________________________________________________________

Previous Owner Name: ____________________________  New Owner Name: ____________________________

Stabilization Measures Implemented Prior to Transfer:

______________________________________________________________

Date transfer of property responsibility and liability becomes effective __________________________

** NOTE: Any change in location, operation, and/or coverage area requires that the Storm Water Pollution Prevention Plan be updated and revised to reflect all changes.

The site (lot) described above is covered under the General Permit for Storm Water Discharges Associated with Construction Activity. Temporary or permanent stabilization has been established on the site, which has now transferred ownership/responsibility as indicated above. The new owners, or operators, have been made aware of the importance of site stabilization in an effort to control pollutant runoff and/or sedimentation.
The new owner assumes responsibility for implementing best management practices to reduce or eliminate a discharge of pollutants to waters of the state. The new owner is aware that permit coverage for the site is required until all soil-disturbing activities at the site have been completed and one of the following conditions have been met:

- all portions of the site not covered by pavement or permanent structures have a uniform perennial vegetative cover over at least 70% of the site; or
- equivalent permanent stabilization measures have been employed, such as the use of riprap, gabions, or geotextiles
