

Well Drillers License Renewal Instructions

South Dakota Water Law requires every well driller to have a current drillers license before doing or contracting for any well drilling work. Enclosed is an application form to renew your License. This form needs to be completed, signed by each license representative, and returned to this office with the fee. The filing fee is based on the residency of the license representative(s) -- \$200.00 for South Dakota resident(s) and \$300.00 for nonresident(s). You are a resident if your primary residence is located in South Dakota and you have not claimed residency in any other state within ninety days of filing this application.

The application form must be returned and a license issued before doing any drilling work during the year for which you are renewing. Renewals submitted after January 31 of the year for which you wish to renew will be returned and the applicant will have to comply with the requirements for new applications.

South Dakota Law (SDCL 46-6-11) requires the well driller to file a well construction report within 30 days of well completion. Prior to your license being renewed, the records of well construction need to be submitted for **ALL** wells constructed during the year for which you were licensed. The well construction reports must be complete and accurate or the reports will be returned. If you have not drilled any wells, please indicate this on the renewal form.

PLEASE NOTE: Some of the operations that are related to water well drilling and completion produce fairly large quantities of water or drilling fluids that must be handled properly. **If drilling fluids or water from a well cannot be totally contained at the drill site, precautions must be taken so the discharge does not enter any stream, river, lake, wetland or drainage.** If it is necessary to discharge to surface water or to a drainage, the Department must approve the activity. Unauthorized discharges may result in enforcement action, including the assessment of penalties of up to \$10,000 per day per violation.

Any discharge to surface water that is the result of well drilling operations must meet the conditions of the General Permit for Temporary Dewatering Activities. Applications for coverage under the General Permit for Temporary Dewatering Activities may be obtained from the Department of Environment and Natural Resources. Coverage under this permit can generally be approved within one day of receipt of the application and no fee is required.

If you have questions, please contact Ken Buhler (605) 773-3352.
