**REVISED RECOMMENDATION OF CHIEF ENGINEER FOR WATER PERMIT
APPLICATION NO. 8195-3, Chad Anderson**

Pursuant to SDCL 46-2A-2, the following is the revised recommendation of the Chief Engineer, Water Rights Program, Department of Environment and Natural Resources concerning Water Permit Application No. 8195-3, Chad Anderson, 47866 244th Street, Dell Rapids SD 57022.

The Chief Engineer is recommending APPROVAL of Application No. 8195-3 because 1) there is reasonable probability that there is unappropriated water available for the applicant's proposed use, 2) the proposed diversion can be developed without unlawful impairment of existing rights, 3) the proposed use is a beneficial use and 4) it is in the public interest with the following qualifications:

1. Low flows as needed for downstream domestic use, including livestock water and prior rights must be bypassed. This permit does not authorize diversion of water from the Big Sioux River, when pumping, unless at least 20 cfs is flowing at the North Cliff Avenue USGS gaging station No. 06482020 and 43 cfs is flowing at the Dell Rapids USGS gaging station No. 06481000, or unless written orders have been issued by the Chief Engineer. Diversion under this permit shall be in accordance with any written orders by the Chief Engineer.
2. The City of Sioux Falls has senior priority rights to Big Sioux River flows under Future Use Permit Nos. 3981-3 and 3981A-3. Future diversion under Permit No 8195-3 will be subject to these prior rights and an increased by-pass may be required if and when the City of Sioux Falls develops the water reserved by Future Use Permit Nos. 3981-3 and 3981A-3.
3. The Water Management Board retains jurisdiction of Permit No 8195-3 in the event that the City of Sioux Falls develops the water reserved by their future use permit or additional information shows that a change needs to be made in the by-pass requirement.
4. This Permit is approved subject to the irrigation water use questionnaire being submitted each year.

See report on application for additional information.

Jeanne Goodman, Chief Engineer
