Comments :

I have a Tesla vehicle and can travel through the state with little issue however I know others that would consider a VW or Ford that is electric but they fear the lack of charging infrastructure would impede their travel. It would be nice to show that SD does not want to lag behind other states when it comes to charging infrastructure. It might seem like a futile act today but in 5 years we will have wished we got ahead of this before the funding dries up. Thank you for the opportunity to comment.
