

# Renewal of VOC Waiver

\_\_\_\_\_ water system is applying to renew the volatile organic chemical (VOC) waiver for the 2017-2022 compliance periods. We have on file with the Department of Environment and Natural Resources (DENR) the following:

1. Hydrological data indicating that our water sources are not vulnerable to VOC contamination for the purposes of obtaining a waiver.
2. A well log or "as-built" well plan indicating that each of our water sources is properly constructed.
3. This system lies outside the Black Hills Hydrology Zone.

Copies of all VOC samples taken since January 1, 2011 must be attached to this renewal form. Results for all regulated VOCs must be "no detect".

We request a renewal of the waiver to cover the following source(s) of water:

Entry Point Name	Year Built
_____	_____
_____	_____
_____	_____
_____	_____

All of the above information is still accurate at this time for our water system.
