* BLM was provided a full electronic copy of the permit application, including the mine and reclamation plans, at the same time the permit application was submitted to DENR. Subsequently BLM was provided with a version of the letter sent to all surface owners within the proposed permit area. The latter transmittal letter indicated that the mine plan and reclamation plan were not enclosed since they had been provided previously.

**Re: Dewey-Burdock Project Large Scale Mine Permit Application
Mine Plan and Reclamation Plan**

Dear Mr. and Mrs. Andersen:

Powertech (USA) Inc. has applied for a large scale mine permit from the South Dakota Department of Environment and Natural Resources (DENR) for the Dewey-Burdock Project, a proposed uranium *in situ* recovery (ISR) project in Custer and Fall River counties, South Dakota. The large scale mine permit application was submitted to DENR on September 28, 2012. DENR is currently reviewing the application for procedural completeness. They have indicated that they will notify Powertech by October 31, 2012 as to whether the application is complete. When the permit application is determined to be procedurally complete and is considered filed, notice of filing will be published in local newspapers. A copy of the notice of filing also will be sent to owners and lessees of surface rights within the proposed permit area. The notice of filing will provide the identity and address of the applicant and resident agent, the location of the proposed mining operation, the primary mineral to be mined, the proposed future use of the affected land, the location where additional information about the operation may be obtained, and the location of and final date for filing objections with the Board of Minerals and Environment.

As a surface owner within the proposed permit area, you are being provided with a copy of the Mine Plan and Reclamation Plan, which are part of the large scale mine permit application. The Mine Plan describes the project location, proposed methods of mining, and monitoring programs that are proposed to detect any potential impacts to human health or the environment. The Reclamation Plan describes in detail how the site would be restored to approximate premining conditions and released by various regulatory agencies for DENR-approved postmining land uses (rangeland and cropland).

The enclosed CD contains an electronic copy of the Mine Plan and Reclamation Plan in Adobe PDF format. It also includes the referenced plates and appendices. A complete, printed copy of the 6-volume application, including the signed permit application form, full application text, plates, appendices, and any updates resulting from DENR completeness and technical review, can be viewed at the following locations:

- Powertech Edgemont Office: 310 2nd Ave, Edgemont
- Custer County Register of Deeds: 420 Mt. Rushmore Road, Custer
- Fall River County Register of Deeds: 906 N. River Street, Hot Springs
- DENR: Joe Foss Building, 523 E. Capitol Ave, Pierre

In addition, the full application is available on the DENR website:
<http://denr.sd.gov/des/mm/powertechminepermitapp.aspx>.

BNSF Railway Company
c/o Chuck Olsen, Roadmaster
4625 West Highway 16
Newcastle, WY 82701

**Re: Dewey-Burdock Project Large Scale Mine Permit Application
Mine Plan and Reclamation Plan**

Dear Mr. Olsen:

Powertech (USA) Inc. has applied for a large scale mine permit from the South Dakota Department of Environment and Natural Resources (DENR) for the Dewey-Burdock Project, a proposed uranium *in situ* recovery (ISR) project in Custer and Fall River counties, South Dakota. The large scale mine permit application was submitted to DENR on September 28, 2012. DENR reviewed the application for procedural completeness and provided a list of completeness comments to Powertech on October 31, 2012. When the permit application is determined to be procedurally complete and is considered filed, notice of filing will be published in local newspapers. A copy of the notice of filing also will be sent to owners and lessees of surface rights within the proposed permit area. The notice of filing will provide the identity and address of the applicant and resident agent, the location of the proposed mining operation, the primary mineral to be mined, the proposed future use of the affected land, the location where additional information about the operation may be obtained, and the location of and final date for filing objections with the Board of Minerals and Environment.

Powertech previously considered BNSF as a surface owner adjacent to the proposed permit area, since mining will not occur inside the railroad right of way. As such, you were previously provided with a copy of the Reclamation Plan, which was provided to all adjacent surface owners. As part of the completeness review, DENR has requested that Powertech consider BNSF as a surface owner inside the proposed permit area. Therefore, you are being provided with a printed copy of both the Mine Plan and Reclamation Plan in one volume. The Mine Plan describes the project location, proposed methods of mining, and monitoring programs that are proposed to detect any potential impacts to human health or the environment. The Reclamation Plan describes in detail how the site would be restored to approximate premining conditions and released by various regulatory agencies for DENR-approved postmining land uses (rangeland and cropland).

In addition to the printed copy, the enclosed CD contains an electronic copy of the Mine Plan and Reclamation Plan in Adobe PDF format. It also includes the referenced plates and appendices. A complete, printed copy of the 6-volume application, including the signed permit application form, full application text, plates, appendices, and any updates resulting from DENR completeness and technical review, can be viewed at the following locations:

- Powertech Edgemont Office: 310 2nd Ave, Edgemont
- Custer County Register of Deeds: 420 Mt. Rushmore Road, Custer
- Fall River County Register of Deeds: 906 N. River Street, Hot Springs
- DENR: Joe Foss Building, 523 E. Capitol Ave, Pierre

Mr. Olsen

Custer County Highway Department
c/o Gary Woodford, Superintendent
25365 U.S. Highway 385
Custer, SD 57730

**Re: Dewey-Burdock Project Large Scale Mine Permit Application
Mine Plan and Reclamation Plan**

Dear Mr. Woodford:

Powertech (USA) Inc. has applied for a large scale mine permit from the South Dakota Department of Environment and Natural Resources (DENR) for the Dewey-Burdock Project, a proposed uranium *in situ* recovery (ISR) project in Custer and Fall River counties, South Dakota. The large scale mine permit application was submitted to DENR on September 28, 2012. DENR reviewed the application for procedural completeness and provided a list of completeness comments to Powertech on October 31, 2012. When the permit application is determined to be procedurally complete and is considered filed, notice of filing will be published in local newspapers. A copy of the notice of filing also will be sent to owners and lessees of surface rights within the proposed permit area. The notice of filing will provide the identity and address of the applicant and resident agent, the location of the proposed mining operation, the primary mineral to be mined, the proposed future use of the affected land, the location where additional information about the operation may be obtained, and the location of and final date for filing objections with the Board of Minerals and Environment.

In response to a DENR procedural completeness comment, Powertech has determined that Custer County owns property inside the proposed permit area along S. Dewey Road. Therefore, the Custer County Highway Department is being provided a printed copy of the Mine Plan and Reclamation Plan. The Mine Plan describes the project location, proposed methods of mining, and monitoring programs that are proposed to detect any potential impacts to human health or the environment. The Reclamation Plan describes in detail how the site would be restored to approximate premining conditions and released by various regulatory agencies for DENR-approved postmining land uses (rangeland and cropland).

In addition to the printed copy, the enclosed CD contains an electronic copy of the Mine Plan and Reclamation Plan in Adobe PDF format. It also includes the referenced plates and appendices. A complete, printed copy of the 6-volume application, including the signed permit application form, full application text, plates, appendices, and any updates resulting from DENR completeness and technical review, can be viewed at the following locations:

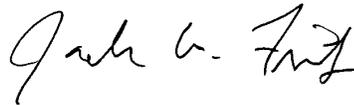

- Powertech Edgemont Office: 310 2nd Ave, Edgemont
- Custer County Register of Deeds: 420 Mt. Rushmore Road, Custer
- Fall River County Register of Deeds: 906 N. River Street, Hot Springs
- DENR: Joe Foss Building, 523 E. Capitol Ave, Pierre

Everett and Dawn Englebert
27449 Dewey Road
Burdock, SD 57735

**Re: Dewey-Burdock Project Large Scale Mine Permit Application
Mine Plan and Reclamation Plan**

Dear Mr. and Mrs. Englebert:

Powertech (USA) Inc. has applied for a large scale mine permit from the South Dakota Department of Environment and Natural Resources (DENR) for the Dewey-Burdock Project, a proposed uranium *in situ* recovery (ISR) project in Custer and Fall River counties, South Dakota. The large scale mine permit application was submitted to DENR on September 28, 2012. DENR is currently reviewing the application for procedural completeness. They have indicated that they will notify Powertech by October 31, 2012 as to whether the application is complete. When the permit application is determined to be procedurally complete and is considered filed, notice of filing will be published in local newspapers. A copy of the notice of filing also will be sent to owners and lessees of surface rights within the proposed permit area. The notice of filing will provide the identity and address of the applicant and resident agent, the location of the proposed mining operation, the primary mineral to be mined, the proposed future use of the affected land, the location where additional information about the operation may be obtained, and the location of and final date for filing objections with the Board of Minerals and Environment.

As a surface owner within the proposed permit area, you are being provided with a copy of the Mine Plan and Reclamation Plan, which are part of the large scale mine permit application. The Mine Plan describes the project location, proposed methods of mining, and monitoring programs that are proposed to detect any potential impacts to human health or the environment. The Reclamation Plan describes in detail how the site would be restored to approximate premining conditions and released by various regulatory agencies for DENR-approved postmining land uses (rangeland and cropland).

The enclosed CD contains an electronic copy of the Mine Plan and Reclamation Plan in Adobe PDF format. It also includes the referenced plates and appendices. A complete, printed copy of the 6-volume application, including the signed permit application form, full application text, plates, appendices, and any updates resulting from DENR completeness and technical review, can be viewed at the following locations:

- Powertech Edgemont Office: 310 2nd Ave, Edgemont
- Custer County Register of Deeds: 420 Mt. Rushmore Road, Custer
- Fall River County Register of Deeds: 906 N. River Street, Hot Springs
- DENR: Joe Foss Building, 523 E. Capitol Ave, Pierre

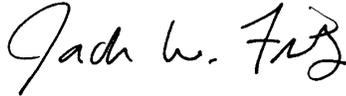

In addition, the full application is available on the DENR website:
<http://denr.sd.gov/des/mm/powertechminepermitapp.aspx>.

Powertech welcomes any questions regarding the large scale mine permit application, other required federal, state and county permits/licenses, or the Dewey-Burdock Project in general.

Fall River County Highway Department
c/o Randy Seiler, Superintendent
906 N. River Street
Hot Springs, SD 57747

**Re: Dewey-Burdock Project Large Scale Mine Permit Application
Mine Plan and Reclamation Plan**

Dear Mr. Seiler:

Powertech (USA) Inc. has applied for a large scale mine permit from the South Dakota Department of Environment and Natural Resources (DENR) for the Dewey-Burdock Project, a proposed uranium *in situ* recovery (ISR) project in Custer and Fall River counties, South Dakota. The large scale mine permit application was submitted to DENR on September 28, 2012. DENR reviewed the application for procedural completeness and provided a list of completeness comments to Powertech on October 31, 2012. When the permit application is determined to be procedurally complete and is considered filed, notice of filing will be published in local newspapers. A copy of the notice of filing also will be sent to owners and lessees of surface rights within the proposed permit area. The notice of filing will provide the identity and address of the applicant and resident agent, the location of the proposed mining operation, the primary mineral to be mined, the proposed future use of the affected land, the location where additional information about the operation may be obtained, and the location of and final date for filing objections with the Board of Minerals and Environment.

In response to a DENR procedural completeness comment, Powertech has determined that Fall River County owns property inside the proposed permit area along S. Dewey Road. Therefore, the Fall River County Highway Department is being provided a printed copy of the Mine Plan and Reclamation Plan. The Mine Plan describes the project location, proposed methods of mining, and monitoring programs that are proposed to detect any potential impacts to human health or the environment. The Reclamation Plan describes in detail how the site would be restored to approximate premining conditions and released by various regulatory agencies for DENR-approved postmining land uses (rangeland and cropland).

In addition to the printed copy, the enclosed CD contains an electronic copy of the Mine Plan and Reclamation Plan in Adobe PDF format. It also includes the referenced plates and appendices. A complete, printed copy of the 6-volume application, including the signed permit application form, full application text, plates, appendices, and any updates resulting from DENR completeness and technical review, can be viewed at the following locations:

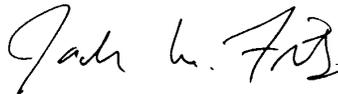

- Powertech Edgemont Office: 310 2nd Ave, Edgemont
- Custer County Register of Deeds: 420 Mt. Rushmore Road, Custer
- Fall River County Register of Deeds: 906 N. River Street, Hot Springs
- DENR: Joe Foss Building, 523 E. Capitol Ave, Pierre

In addition, the full application is available on the DENR website:
<http://denr.sd.gov/des/mm/powertechminepermitapp.aspx>.

Mine Plan and Reclamation Plan**

Dear Mr. Peterson:

Powertech (USA) Inc. has applied for a large scale mine permit from the South Dakota Department of Environment and Natural Resources (DENR) for the Dewey-Burdock Project, a proposed uranium *in situ* recovery (ISR) project in Custer and Fall River counties, South Dakota. The large scale mine permit application was submitted to DENR on September 28, 2012. DENR is currently reviewing the application for procedural completeness. They have indicated that they will notify Powertech by October 31, 2012 as to whether the application is complete. When the permit application is determined to be procedurally complete and is considered filed, notice of filing will be published in local newspapers. A copy of the notice of filing also will be sent to owners and lessees of surface rights within the proposed permit area. The notice of filing will provide the identity and address of the applicant and resident agent, the location of the proposed mining operation, the primary mineral to be mined, the proposed future use of the affected land, the location where additional information about the operation may be obtained, and the location of and final date for filing objections with the Board of Minerals and Environment.

As a surface owner within the proposed permit area, you are being provided with a copy of the Mine Plan and Reclamation Plan, which are part of the large scale mine permit application. The Mine Plan describes the project location, proposed methods of mining, and monitoring programs that are proposed to detect any potential impacts to human health or the environment. The Reclamation Plan describes in detail how the site would be restored to approximate premining conditions and released by various regulatory agencies for DENR-approved postmining land uses (rangeland and cropland).

The enclosed CD contains an electronic copy of the Mine Plan and Reclamation Plan in Adobe PDF format. It also includes the referenced plates and appendices. A complete, printed copy of the 6-volume application, including the signed permit application form, full application text, plates, appendices, and any updates resulting from DENR completeness and technical review, can be viewed at the following locations:

- Powertech Edgemont Office: 310 2nd Ave, Edgemont
- Custer County Register of Deeds: 420 Mt. Rushmore Road, Custer
- Fall River County Register of Deeds: 906 N. River Street, Hot Springs
- DENR: Joe Foss Building, 523 E. Capitol Ave, Pierre

In addition, the full application is available on the DENR website:
<http://denr.sd.gov/des/mm/powertechminepermitapp.aspx>.

Mr. Peterson

**Re: Dewey-Burdock Project
Large Scale Mine Permit Application**

Dear Mr. Cepak:

By this letter, Powertech (USA) Inc. submits this large scale mine permit application to the South Dakota Department of Environment and Natural Resources for the Dewey-Burdock Project, a proposed uranium *in situ* recovery (ISR) project in Custer and Fall River counties, South Dakota.

Enclosed please find the following:

- Three bound copies of the application organized as follows:
 - Volume 1: Report
 - Volumes 2-3: Plates
 - Volumes 4-6: Appendices
- Three copies of the signed and notarized permit application form (included as Appendix 1.0-A in Volume 4 of the application)
- Three DVDs containing electronic copies of the application, accompanying report, plates and appendices

Powertech (USA) Inc. will submit under separate cover the following:

- One copy (13 bound volumes) of Appendix 3.11-A, Cultural Resources Report; portions of which are provided (and marked) as confidential.
- A check for the permit application fee of \$50,000

In accordance with ARSD 74:29:01:04(1), one printed and electronic copy of the application has been submitted to the offices of the register of deeds in Custer and Fall River counties. In accordance with ARSD 74:29:01:04(2), electronic copies of the complete application have been provided to the Department of Game, Fish & Parks; Department of Agriculture; Department of Tourism, Archeological Research Center (formerly Department of Education and Cultural

Marian Atkins
U.S. Department of the Interior
Bureau of Land Management
310 Roundup Street
Belle Fourche, SD 57717

**Re: Dewey-Burdock Project Large Scale Mine Permit Application
Mine Plan and Reclamation Plan**

Dear Ms. Atkins:

Powertech (USA) Inc. has applied for a large scale mine permit from the South Dakota Department of Environment and Natural Resources (DENR) for the Dewey-Burdock Project, a proposed uranium *in situ* recovery (ISR) project in Custer and Fall River counties, South Dakota. The large scale mine permit application was submitted to DENR on September 28, 2012. DENR is currently reviewing the application for procedural completeness. They have indicated that they will notify Powertech by October 31, 2012 as to whether the application is complete. When the permit application is determined to be procedurally complete and is considered filed, notice of filing will be published in local newspapers. A copy of the notice of filing also will be sent to owners and lessees of surface rights within the proposed permit area. The notice of filing will provide the identity and address of the applicant and resident agent, the location of the proposed mining operation, the primary mineral to be mined, the proposed future use of the affected land, the location where additional information about the operation may be obtained, and the location of and final date for filing objections with the Board of Minerals and Environment.

As a surface owner within the proposed permit area, the Bureau of Land Management has been provided with a copy of the Mine Plan and Reclamation Plan, which are part of the large scale mine permit application previously provided. The Mine Plan describes the project location, proposed methods of mining, and monitoring programs that are proposed to detect any potential impacts to human health or the environment. The Reclamation Plan describes in detail how the site would be restored to approximate premining conditions and released by various regulatory agencies for DENR-approved postmining land uses (rangeland and cropland).

A complete, printed copy of the 6-volume application, including the signed permit application form, full application text, plates, appendices, and any updates resulting from DENR completeness and technical review, can be viewed at the following locations:

- Powertech Edgemont Office: 310 2nd Ave, Edgemont
- Custer County Register of Deeds: 420 Mt. Rushmore Road, Custer
- Fall River County Register of Deeds: 906 N. River Street, Hot Springs
- DENR: Joe Foss Building, 523 E. Capitol Ave, Pierre

In addition, the full application is available on the DENR website:
<http://denr.sd.gov/des/mm/powertechminepermitapp.aspx>.

Powertech welcomes any questions regarding the large scale mine permit application, other required federal, state and county permits/licenses, or the Dewey-Burdock Project in general.

Ms. Atkins

James and Rose Andersen
P.O. Box 33
Hermosa, SD 57744

**Re: Dewey-Burdock Project Large Scale Mine Permit Application
Reclamation Plan**

Dear Mr. and Mrs. Andersen:

Powertech (USA) Inc. has applied for a large scale mine permit from the South Dakota Department of Environment and Natural Resources (DENR) for the Dewey-Burdock Project, a proposed uranium *in situ* recovery (ISR) project in Custer and Fall River counties, South Dakota. Please refer to Figures 1.2-1 and 2.0-1, enclosed, for the proposed project location and proposed permit area. The large scale mine permit application was submitted to DENR on September 28, 2012. DENR is currently reviewing the application for procedural completeness. They have indicated that they will notify Powertech by October 31, 2012 as to whether the application is complete. When the permit application is determined to be procedurally complete and is considered filed, notice of filing will be published in local newspapers. The notice of filing will provide the identity and address of the applicant and resident agent, the location of the proposed mining operation, the primary mineral to be mined, the proposed future use of the affected land, the location where additional information about the operation may be obtained, and the location of and final date for filing objections with the Board of Minerals and Environment.

As a surface owner adjacent to the proposed permit area, you are being provided with a copy of the Reclamation Plan, which is part of the large scale mine permit application. Following is a brief overview of the proposed Dewey-Burdock Project and a description of the enclosed Reclamation Plan.

The Dewey-Burdock Project is a proposed uranium ISR project. Upon receipt of all relevant permits and licenses, the uranium would be recovered by injecting groundwater fortified with oxygen and carbon dioxide into injection wells and recovering the resulting uranium-bearing solution from production wells. The uranium would be recovered and processed into the final product, yellowcake, which would be packaged in sealed containers and shipped for further processing to be used in the uranium fuel cycle. After uranium removal, the groundwater would be refortified with oxygen and carbon dioxide and recirculated through the well fields. The uranium mineralization that would be targeted for production is contained within the Inyan Kara Group. The anticipated depth of mineralization ranges from about 200 to 800 feet below ground surface. Groundwater restoration would be completed following uranium recovery in each well field, during which the groundwater in the well field would be restored in accordance with U.S. Nuclear Regulatory Commission (NRC) license requirements. Following groundwater restoration in all well fields, all equipment would be removed and the site reclaimed.

An extensive monitoring system would be implemented during all project phases to detect any potential impacts to human health or the environment. The monitoring would be conducted in accordance with the requirements of relevant licenses and permits, the applications for which are currently under regulatory review. These include applications for an NRC license, large scale

Mr. and Mrs. Andersen
October 12, 2012
Page 2 of 2

mine permit, and U.S. Environmental Protection Agency (EPA) Underground Injection Control permits. The monitoring systems would be used to evaluate any potential changes in groundwater quality, surface water quality or air quality in and around the proposed permit area.

The enclosed Reclamation Plan describes in detail how the site would be restored to approximate premining conditions and released by various regulatory agencies for DENR-approved postmining land uses (rangeland and cropland). A financial assurance mechanism, anticipated to consist of one or more bonds, would be posted for all reclamation activities in an amount approved by DENR, NRC, EPA and the Bureau of Land Management.

The enclosed CD contains an electronic copy of the Reclamation Plan in Adobe PDF format. It also includes the referenced plates and appendices. A complete, printed copy of the 6-volume application, including the signed permit application form, full application text, plates, appendices, and any updates resulting from DENR completeness and technical review, can be viewed at the following locations:

- Powertech Edgemont Office: 310 2nd Ave, Edgemont
- Custer County Register of Deeds: 420 Mt. Rushmore Road, Custer
- Fall River County Register of Deeds: 906 N. River Street, Hot Springs
- DENR: Joe Foss Building, 523 E. Capitol Ave, Pierre

In addition, the full application is available on the DENR website:
<http://denr.sd.gov/des/mm/powertechminepermitapp.aspx>.

Powertech welcomes any questions regarding the large scale mine permit application, other required federal, state and county permits/licenses, or the Dewey-Burdock Project in general. Please direct any questions to Mark Hollenbeck, (605) 662-8308, or Richard Blubaugh, (303) 790-7528. On behalf of Powertech, I also would be happy to answer any questions regarding the enclosed Reclamation Plan and can be reached at (307) 672-0761. In addition, questions may be directed to Mike Cepak or Eric Holm with DENR, (605) 773-4201. Thank you for your time.

Sincerely,

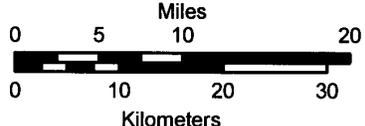

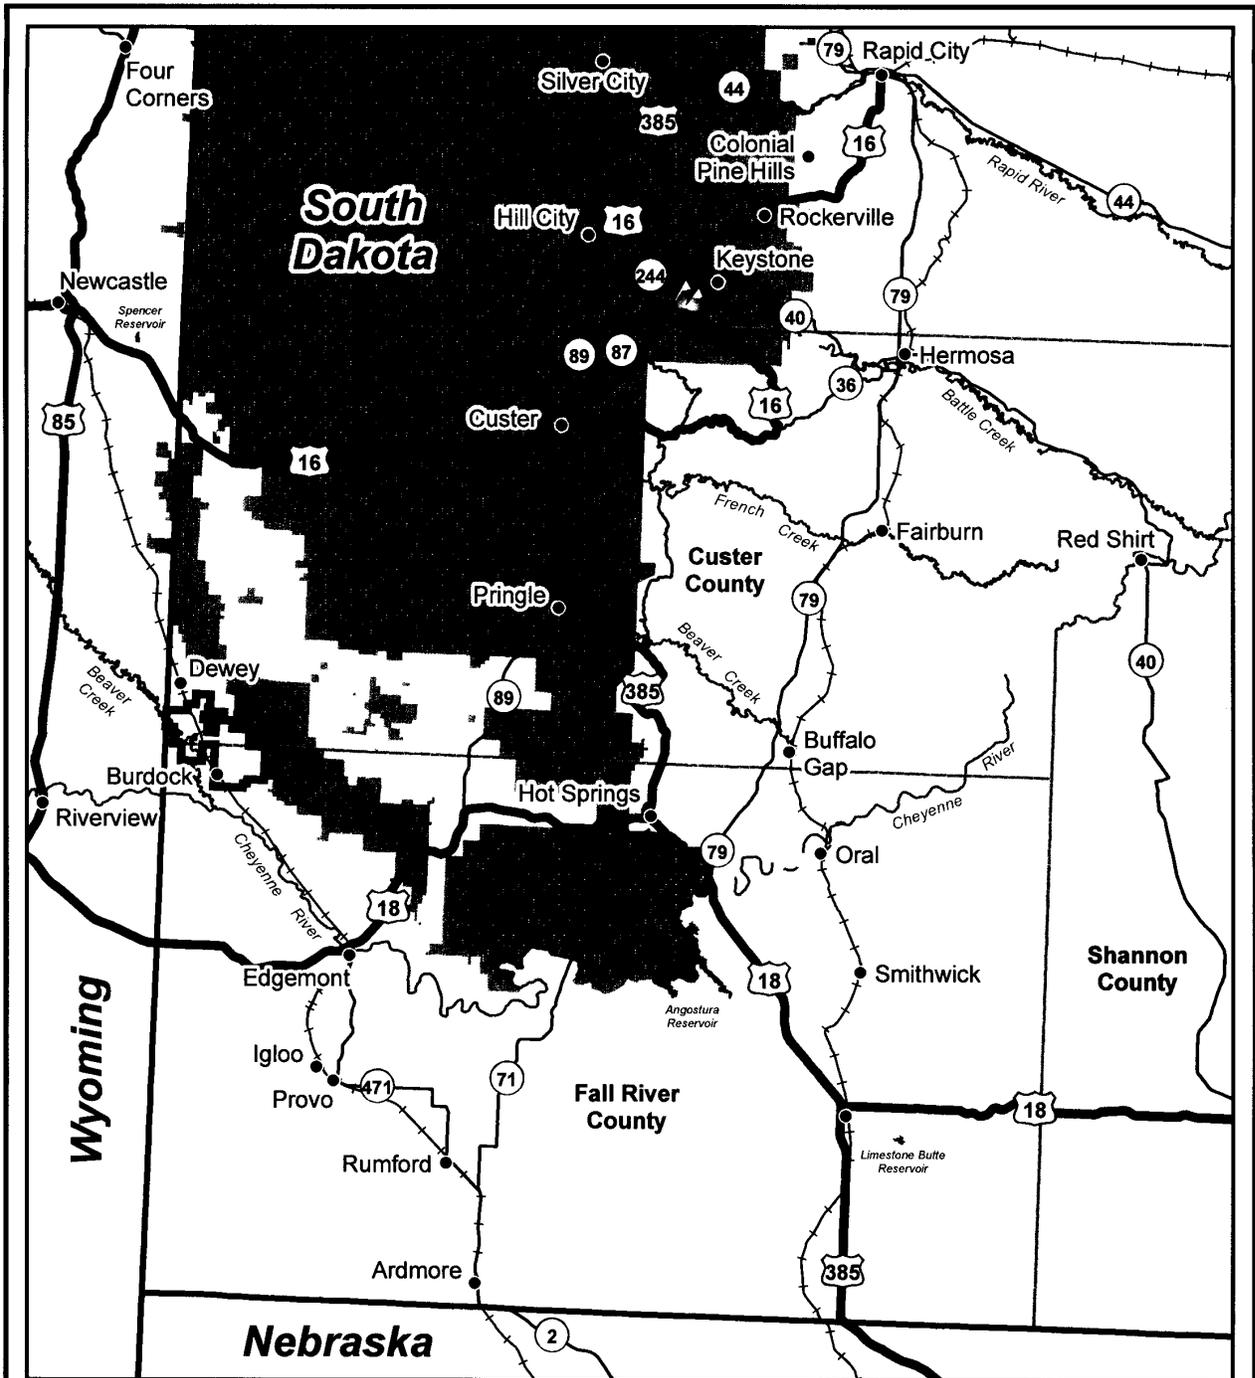

Jack Fritz, P.E.

School and Public Lands
500 East Capitol Avenue
Pierre, SD 57501

**Re: Dewey-Burdock Project Large Scale Mine Permit Application
Reclamation Plan**

Dear Mr. Johnson:

Powertech (USA) Inc. has applied for a large scale mine permit from the South Dakota Department of Environment and Natural Resources (DENR) for the Dewey-Burdock Project, a proposed uranium *in situ* recovery (ISR) project in Custer and Fall River counties, South Dakota. Please refer to Figures 1.2-1 and 2.0-1, enclosed, for the proposed project location and proposed permit area. The large scale mine permit application was submitted to DENR on September 28, 2012. DENR is currently reviewing the application for procedural completeness. They have indicated that they will notify Powertech by October 31, 2012 as to whether the application is complete. When the permit application is determined to be procedurally complete and is considered filed, notice of filing will be published in local newspapers. The notice of filing will provide the identity and address of the applicant and resident agent, the location of the proposed mining operation, the primary mineral to be mined, the proposed future use of the affected land, the location where additional information about the operation may be obtained, and the location of and final date for filing objections with the Board of Minerals and Environment.

As a surface owner adjacent to the proposed permit area, the State of South Dakota School and Public Lands is being provided with a copy of the Reclamation Plan, which is part of the large scale mine permit application. Following is a brief overview of the proposed Dewey-Burdock Project and a description of the enclosed Reclamation Plan.

The Dewey-Burdock Project is a proposed uranium ISR project. Upon receipt of all relevant permits and licenses, the uranium would be recovered by injecting groundwater fortified with oxygen and carbon dioxide into injection wells and recovering the resulting uranium-bearing solution from production wells. The uranium would be recovered and processed into the final product, yellowcake, which would be packaged in sealed containers and shipped for further processing to be used in the uranium fuel cycle. After uranium removal, the groundwater would be refortified with oxygen and carbon dioxide and recirculated through the well fields. The uranium mineralization that would be targeted for production is contained within the Inyan Kara Group. The anticipated depth of mineralization ranges from about 200 to 800 feet below ground surface. Groundwater restoration would be completed following uranium recovery in each well field, during which the groundwater in the well field would be restored in accordance with U.S. Nuclear Regulatory Commission (NRC) license requirements. Following groundwater restoration in all well fields, all equipment would be removed and the site reclaimed.

An extensive monitoring system would be implemented during all project phases to detect any potential impacts to human health or the environment. The monitoring would be conducted in

accordance with the requirements of relevant licenses and permits, the applications for which are currently under regulatory review. These include applications for an NRC license, large scale mine permit, and U.S. Environmental Protection Agency (EPA) Underground Injection Control permits. The monitoring systems would be used to evaluate any potential changes in groundwater quality, surface water quality or air quality in and around the proposed permit area.

The enclosed Reclamation Plan describes in detail how the site would be restored to approximate premining conditions and released by various regulatory agencies for DENR-approved postmining land uses (rangeland and cropland). A financial assurance mechanism, anticipated to consist of one or more bonds, would be posted for all reclamation activities in an amount approved by DENR, NRC, EPA and the Bureau of Land Management.

The enclosed CD contains an electronic copy of the Reclamation Plan in Adobe PDF format. It also includes the referenced plates and appendices. A complete, printed copy of the 6-volume application, including the signed permit application form, full application text, plates, appendices, and any updates resulting from DENR completeness and technical review, can be viewed at the following locations:

- Powertech Edgemont Office: 310 2nd Ave, Edgemont
- Custer County Register of Deeds: 420 Mt. Rushmore Road, Custer
- Fall River County Register of Deeds: 906 N. River Street, Hot Springs
- DENR: Joe Foss Building, 523 E. Capitol Ave, Pierre

In addition, the full application is available on the DENR website:
<http://denr.sd.gov/des/mm/powertechminepermitapp.aspx>.

Powertech welcomes any questions regarding the large scale mine permit application, other required federal, state and county permits/licenses, or the Dewey-Burdock Project in general. Please direct any questions to Mark Hollenbeck, (605) 662-8308, or Richard Blubaugh, (303) 790-7528. On behalf of Powertech, I also would be happy to answer any questions regarding the enclosed Reclamation Plan and can be reached at (307) 672-0761. In addition, questions may be directed to Mike Cepak or Eric Holm with DENR, (605) 773-4201. Thank you for your time.

Sincerely,

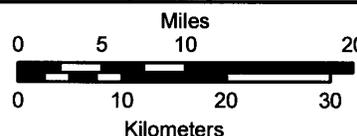

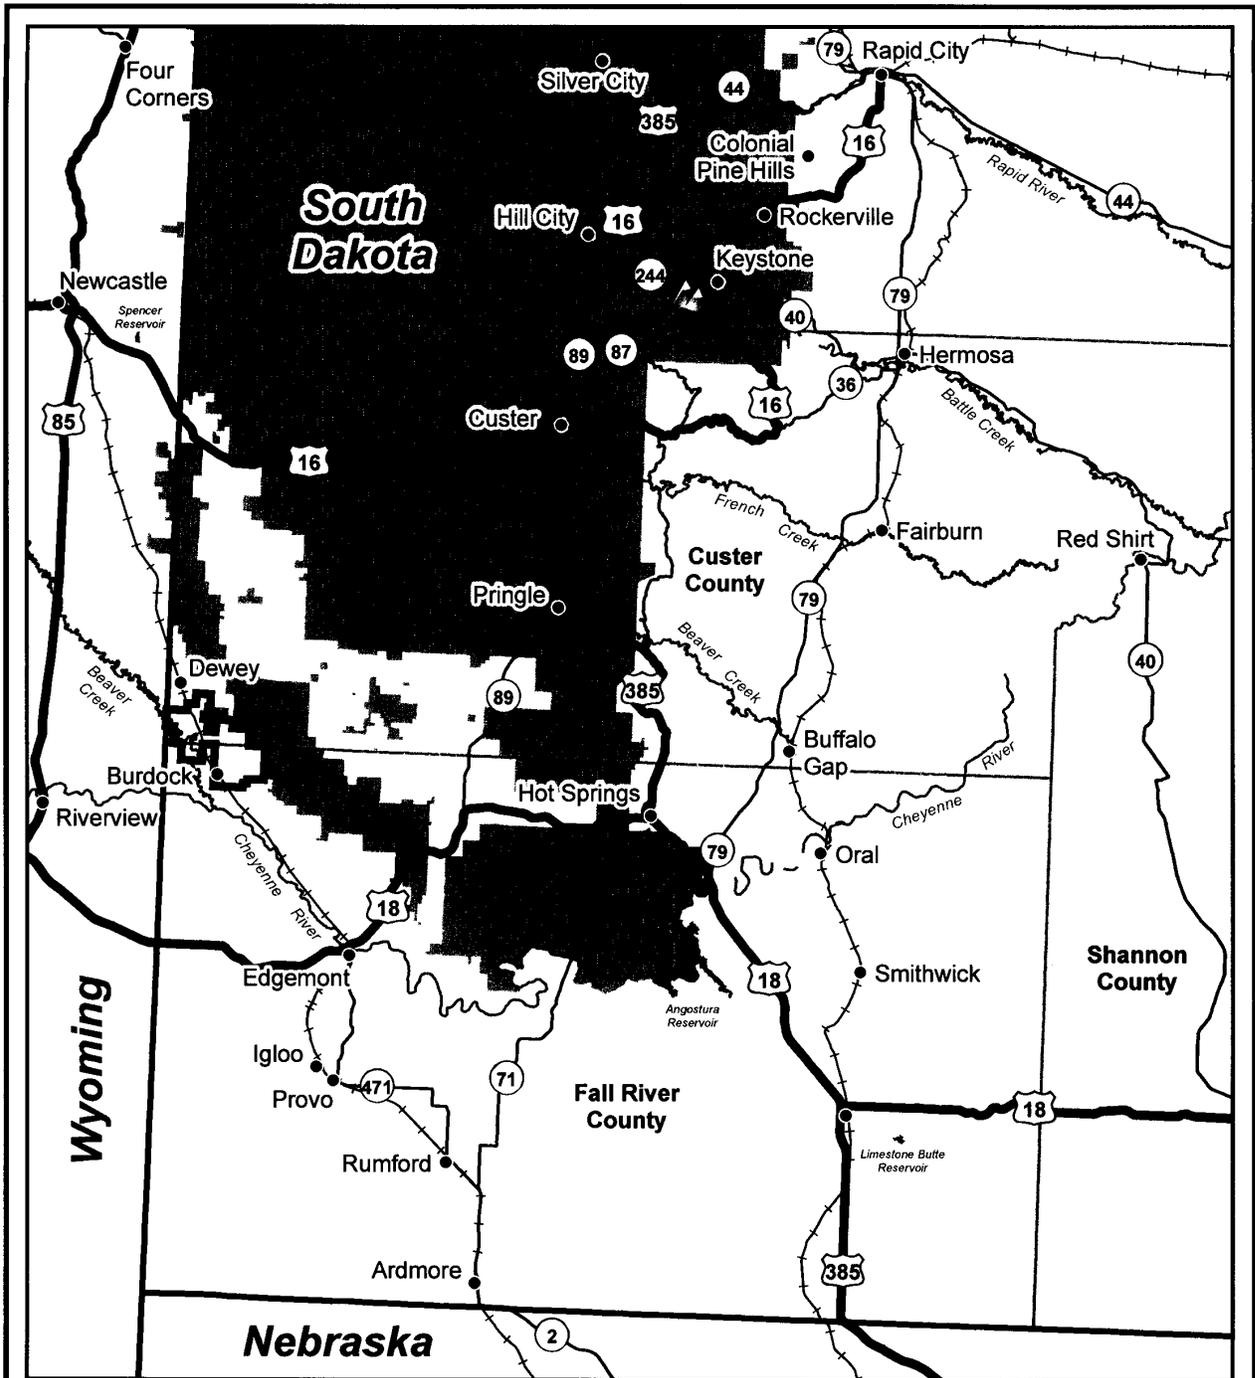

Jack Fritz, P.E.

Mr. Craig Bobzien, Supervisor
U.S. Department of Agriculture
Black Hills National Forest
1019 North 5th Street
Custer, SD 57730

**Re: Dewey-Burdock Project Large Scale Mine Permit Application
Reclamation Plan**

Dear Mr. Bobzien:

Powertech (USA) Inc. has applied for a large scale mine permit from the South Dakota Department of Environment and Natural Resources (DENR) for the Dewey-Burdock Project, a proposed uranium *in situ* recovery (ISR) project in Custer and Fall River counties, South Dakota. Please refer to Figures 1.2-1 and 2.0-1, enclosed, for the proposed project location and proposed permit area. The large scale mine permit application was submitted to DENR on September 28, 2012. DENR is currently reviewing the application for procedural completeness. They have indicated that they will notify Powertech by October 31, 2012 as to whether the application is complete. When the permit application is determined to be procedurally complete and is considered filed, notice of filing will be published in local newspapers. The notice of filing will provide the identity and address of the applicant and resident agent, the location of the proposed mining operation, the primary mineral to be mined, the proposed future use of the affected land, the location where additional information about the operation may be obtained, and the location of and final date for filing objections with the Board of Minerals and Environment.

As a surface owner adjacent to the proposed permit area, the Black Hills National Forest is being provided with a copy of the Reclamation Plan, which is part of the large scale mine permit application. Following is a brief overview of the proposed Dewey-Burdock Project and a description of the enclosed Reclamation Plan.

The Dewey-Burdock Project is a proposed uranium ISR project. Upon receipt of all relevant permits and licenses, the uranium would be recovered by injecting groundwater fortified with oxygen and carbon dioxide into injection wells and recovering the resulting uranium-bearing solution from production wells. The uranium would be recovered and processed into the final product, yellowcake, which would be packaged in sealed containers and shipped for further processing to be used in the uranium fuel cycle. After uranium removal, the groundwater would be refortified with oxygen and carbon dioxide and recirculated through the well fields. The uranium mineralization that would be targeted for production is contained within the Inyan Kara Group. The anticipated depth of mineralization ranges from about 200 to 800 feet below ground surface. Groundwater restoration would be completed following uranium recovery in each well field, during which the groundwater in the well field would be restored in accordance with U.S. Nuclear Regulatory Commission (NRC) license requirements. Following groundwater restoration in all well fields, all equipment would be removed and the site reclaimed.

An extensive monitoring system would be implemented during all project phases to detect any potential impacts to human health or the environment. The monitoring would be conducted in

Mr. Bobzien
October 12, 2012
Page 2 of 2

accordance with the requirements of relevant licenses and permits, the applications for which are currently under regulatory review. These include applications for an NRC license, large scale mine permit, and U.S. Environmental Protection Agency (EPA) Underground Injection Control permits. The monitoring systems would be used to evaluate any potential changes in groundwater quality, surface water quality or air quality in and around the proposed permit area.

The enclosed Reclamation Plan describes in detail how the site would be restored to approximate premining conditions and released by various regulatory agencies for DENR-approved postmining land uses (rangeland and cropland). A financial assurance mechanism, anticipated to consist of one or more bonds, would be posted for all reclamation activities in an amount approved by DENR, NRC, EPA and the Bureau of Land Management.

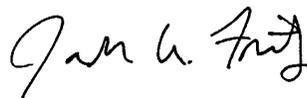

The enclosed CD contains an electronic copy of the Reclamation Plan in Adobe PDF format. It also includes the referenced plates and appendices. A complete, printed copy of the 6-volume application, including the signed permit application form, full application text, plates, appendices, and any updates resulting from DENR completeness and technical review, can be viewed at the following locations:

- Powertech Edgemont Office: 310 2nd Ave, Edgemont
- Custer County Register of Deeds: 420 Mt. Rushmore Road, Custer
- Fall River County Register of Deeds: 906 N. River Street, Hot Springs
- DENR: Joe Foss Building, 523 E. Capitol Ave, Pierre

In addition, the full application is available on the DENR website:
<http://denr.sd.gov/des/mm/powertechminepermitapp.aspx>.

Powertech welcomes any questions regarding the large scale mine permit application, other required federal, state and county permits/licenses, or the Dewey-Burdock Project in general. Please direct any questions to Mark Hollenbeck, (605) 662-8308, or Richard Blubaugh, (303) 790-7528. On behalf of Powertech, I also would be happy to answer any questions regarding the enclosed Reclamation Plan and can be reached at (307) 672-0761. In addition, questions may be directed to Mike Cepak or Eric Holm with DENR, (605) 773-4201. Thank you for your time.

Sincerely,

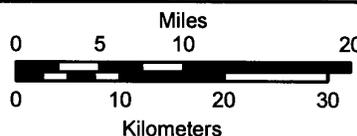

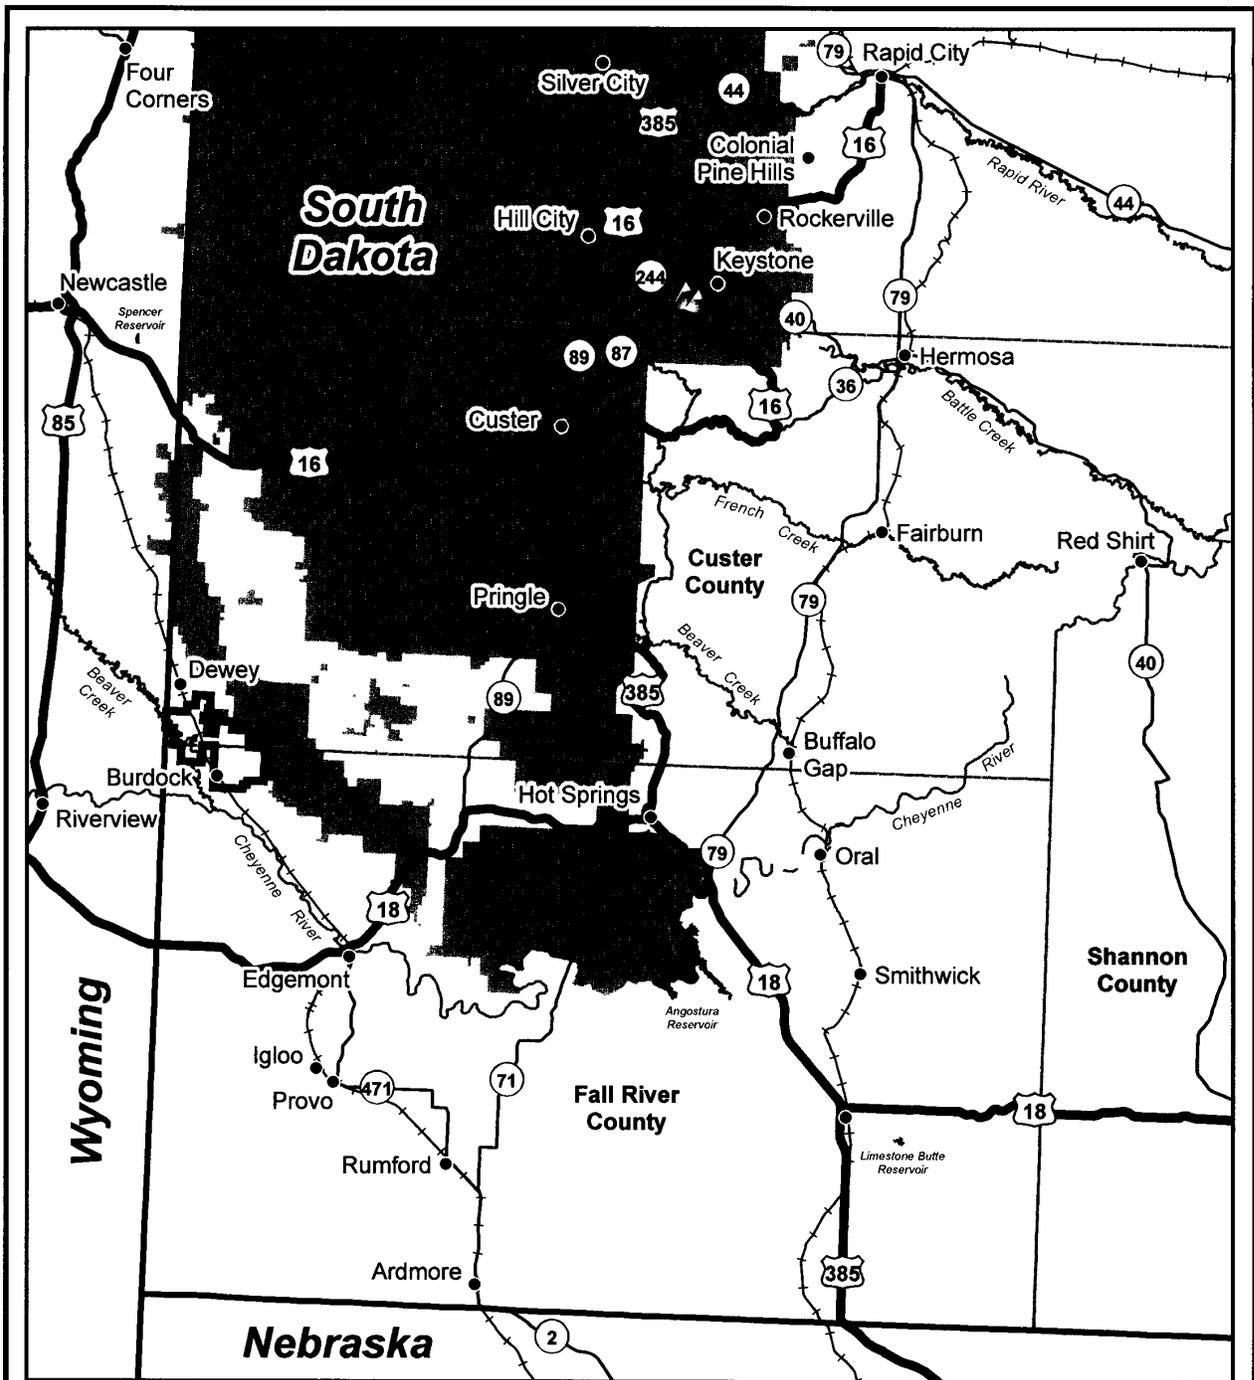

Jack Fritz, P.E.
