RE: Application for a Large Scale Mine Permit by Powertech

Dear Mr. Cepak:

I am requesting that a contested case be initiated in the above matter and that I be admitted as an intervenor in the above application.

I am concerned about this application because I am interested in water quality, land use, wildlife, health, and the economy in western South Dakota. I oppose this application because I believe the proposed mine would harm public health, the economy, and the environment, including impacts to the Inyan Kara, Minnelusa, Madison, and Deadwood formations and the Cheyenne River. I also believe this is an inappropriate land use.

I hold a Bachelors Degree in Science and graduated with honors in January 2012. I am well aware it is impossible to return the land and water to preoperational condition, anyone telling you different either doesn't understand the science or has a vested interest in this project. We have put our relocation plans of our publishing company, our movie production house and of course our home on hold until this process is completed and the outcome is determined. Property values will go down just look at Powertech's own property value in the Centennial Project, which seen a sale price \$105,000.00 lower than what they paid for it in 2007. I will not risk the lives of my children, grandchildren, employees or friends to the deadly toxins this project will created. Our companies would bring millions of much needed economic development to the Hot Springs area without the devastation Powertech brings.

I oppose the proposed project and want the permit application to be denied.

Please keep me informed of all proceedings and documents related to this application.

Thank you.

Sincerely,

RE: Application for a Large Scale Mine Permit by Powertech (USA) Inc.

Dear Mr. Cepak:

I am requesting that a contested case be initiated in the above matter and that I be admitted as an intervenor in the above application.

I am concerned about this application because I am interested in water quality, land use, wildlife, health, and the economy in western South Dakota and eastern Wyoming. Mining uranium and vanadium are inherently polluting, and the in situ leach mining method in particular has a history of water contamination. Powertech is financially unstable and unable to complete a mine, leaving the possibility that this project could end up in the hands of another company that is currently unknown -- and whose environmental record, ethical record, and financial status are also unknown.

I oppose this application because I believe the proposed mine would harm public health, the economy, and the environment, including impacts to the Inyan Kara, Minnelusa, Madison, and Deadwood formations and to the Cheyenne River. I also believe this is an inappropriate land use.

I oppose the proposed project and want the permit application to be denied.

Please keep me informed of all proceedings and documents related to this application.

Thank you.

Sincerely,

Lilia Jarding, Ph.D.

RE: Powertech application for large scale mining permit

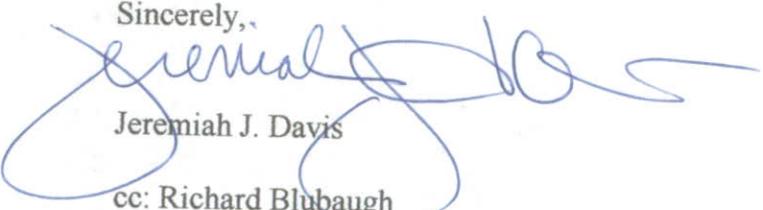

Dear Mr. Cepak:

I am requesting that a contested case be initiated in the above-referenced matter and am asking to be admitted as an intervenor in the above application.

I am concerned about this application because I am interested in water quality, land use, wildlife, health, and the economy of western South Dakota. I oppose Powertech's application because I believe the proposed uranium mine would harm the public health, economy, and environment of our region, including negative impacts to the Inyan Kara, Minnelusa, Madison, and Deadwood formations and the Cheyenne River, including Angostura Reservoir. I believe it is an inappropriate land use.

Because I oppose the project, I want the permit application application to be denied. Please keep me informed of all proceedings and documents related to this application. Thank you for your consideration.

Sincerely,

Jeremiah J. Davis
