Dear Mr. Walsh:

Re: Case No. S-2017, Peter K. Roosevelt Injection
Well Permit Request

This is to object to the Peter K. Roosevelt Injection Well Permit Request. I feel this will damage the underground water supplies on which southern Fall River County depends for livestock and household water. My ranch utilizes water from the Madison, and the Inyan Kara, plus a natural flowing spring that has water input from deep water formations and ground water.

The continued use of abandoned wells for disposal of toxic waste will eventually make these sources of water irrevocably polluted. We cannot replace this water.

I plan to speak against this project at the hearing and reserve the right to bring legal counsel and other expert witnesses to speak for me also.

Advise me as to when the hearing will be held.

Very truly yours,

Susan R. Henderson
