Gov. Noem Announces \$2.125 Million for Renner Sanitary District Wastewater and Storm Water System Improvements

PIERRE, S.D. – Gov. Kristi Noem says the Board of Water and Natural Resources has approved a \$2,125,000 funding package for Renner Sanitary District to make wastewater and storm water system improvements.

The funding package includes a \$978,000 Consolidated Water Facilities Construction Program grant and a \$1,147,000 Clean Water State Revolving Fund loan. Terms are 2.125 percent for 30 years. The funds will be administered through the Department of Environment and Natural Resources

“I am pleased to announce that the Renner Sanitary District will receive this assistance,” said Gov. Noem. “The funding will help the district make needed upgrades to its wastewater and storm water systems to reduce costs, better serve its customers, and protect the environment.”

The Renner Sanitary District sends its wastewater to the City of Sioux Falls. Recent flooding has increased the volume of groundwater entering the system straining the infrastructure and increasing costs. Project improvements include rehabilitation and Supervisory Control and Data Acquisition (SCADA) upgrades at three lift stations and storm water improvements to reduce the volume of groundwater entering the wastewater system.

The funding package will cover the estimated cost of the project.

The Consolidated Water Facilities Construction Program, funded in part by revenues from the Petroleum Release Compensation Tank Inspecting fee and the sale of lotto tickets, provides grants and loans for water, wastewater, and watershed projects.

The State of South Dakota and the U.S. Environmental Protection Agency fund the Clean Water State Revolving Fund Program, which provides low-interest loans for wastewater, storm water and nonpoint source projects.

The board met today via remote video connection.
