Gov. Noem Announces nearly \$1.2 Million for Andover Wastewater and Storm Water System Improvements

PIERRE, S.D. – Gov. Kristi Noem says the Board of Water and Natural Resources has approved a \$1,168,000 loan for the City of Andover to make wastewater and storm water system improvements.

The \$1,168,000 Clean Water State Revolving Fund loan includes \$1,068,000 in principal forgiveness. Loan terms are 2.125 percent for 30 years.

“I am pleased to announce that the City of Andover will receive this assistance,” said Gov. Noem. “The funding will help the city make needed upgrades to its wastewater and storm water systems to better serve its customers and protect the environment.”

During rain events Andover’s wastewater system is prone to back-ups and unwanted discharges from the treatment ponds. Project improvements to reduce inflows into the wastewater system include disconnecting portions of the storm water system from the wastewater system, installing storm water pipe along Railroad Avenue, and lining of the existing wastewater main using cured-in-place pipe (CIPP).

The loan will cover the estimated cost of the project.

The State of South Dakota and the U.S. Environmental Protection Agency fund the Clean Water State Revolving Fund Program, which provides low-interest loans for wastewater, storm water and nonpoint source projects. Principal forgiveness is a subsidy option that results in a reduced loan payment amount for the borrower.

The board met today via remote video connection.
