**Federal Fiscal Year 2013**

**South Dakota NPS Program Structure and Management**

The South Dakota Nonpoint Source (NPS) Pollution Program is administered by the South Dakota Department of Environment and Natural Resources' (DENR) Watershed Protection Program (WPP). NPS pollution activities completed by program staff are selected to improve, restore and maintain the water quality of the state's lakes, streams, wetlands, and ground water in partnership with other organizations, agencies and citizens. For more information about DENR's NPS activities visit:

<http://denr.sd.gov/dfta/wp/wp.aspx>

Note: *In 2014 DENR will complete the update of the States NPS Management Plan.*

The South Dakota Nonpoint Source Task Force is DENR's primary partner for implementation of the South Dakota NPS Program. The task force is a citizen's advisory group with a membership of approximately twenty-five agencies, organizations and tribal representatives (see Table 1). For additional information about the task force visit:

<http://denr.sd.gov/dfta/wp/npstf.aspx>

**Table 1. NPS Task Force Core Agencies & Interest Groups**

Corn Growers Association	SD Pork Producers
Izaak Walton League of America	SD Wheat, Inc.
Lower Brule Sioux Tribe	South Dakota State University
Natural Resources Conservation Service	US Bureau of Reclamation
Planning Districts	US Fish and Wildlife Services
Resource Conservation and Development Councils	US Forest Service
SD Assoc. of Conservation Districts	US Geological Survey
SD Cattlemen's Association	Water Development Districts
SD Chapter of the Sierra Club	SD Farmers Union
SD Conservation Commission

SD Dept. of Transportation	
SD Farm Bureau	
SD Grassland Coalition	

## 319 Grant

The South Dakota Department of Environment and Natural Resources' FFY 2013 Section 319 grant award from the Environmental Protection Agency (EPA) consisted of \$792,400 in base funds and \$1,638,600 in incremental funds. The \$2,431,000 total award was allocated as follows: Staff & Support - \$600,000 and 319 Projects - \$1,831,000. Projects awarded funding from the Department's FFY 2013 Grant are listed in Table 2.

\*The South Dakota Board of Water and Natural Resources approved using \$415,000 in Clean Water State Revolving Fund (CWSRF) Water Quality Grant dollars to supplement the 319 pass through funds.

**Table 2. FFY 2013 Section 319 Project Awards**

Project	Project Grant (\$)		
	Base	Incremental	Total
<b>Staff &amp; Support</b>			
DENR Staffing and Technical Support	\$ 600,000		\$ 600,000
<b>Implementation</b>			
Belle Fourche River – Segment 6	\$ 192,400	\$ 612,600	\$ 805,000
Lewis & Clark Project – Segment 3 (Amendment)		\$ 300,000	\$ 300,000
303d Planning & Technical Assistance – Segment 3		\$ 455,000	\$ 455,000
Grassland Management & Planning Segment 4		\$ 201,000	\$ 201,000
Impacts of Winter Manure Spreading–Seg. 1 (Amendment)		\$ 70,000	\$ 70,000
<b>Total 319</b>	<b>\$792,400</b>	<b>\$1,638,600</b>	<b>\$ 2,431,000</b>
*CWSRF Water Quality Grants			<b>\$ 415,000</b>

Projects (Table 3) awarded 319 funding during FFY 2013 using prior year funds reverted from projects that were completed but did not expend the total amount awarded.

**Table 3. Projects Awarded Section 319 Grants from Prior Year Funds**

Project	Grant (\$)	319 Grant Year
<b>Implementation</b>		
NPS Information & Education Segment 3	\$ 78,792	2008 & 2010
Lower James River Project Segment 3	\$ 74,834	2009
Spring Creek Watershed Project Segment 2	\$ 160,607	2011
Lewis & Clark Project Segment 3	\$ 321,770	2008, 2009, 2010
Impacts of Winter Manure Spreading Segment 1	\$ 10,657	2012
Upper Big Sioux Project Segment 6	\$ 193,180	2010
<b>Total</b>	<b>\$ 839,840</b>	

## Active 319 Projects

A list of Section 319 projects funded by previous grant awards that were open during the FFY 2013 reporting period is provided in Appendix A. The list is arranged by river basin.

## Completed 319 Projects

Table 4 contains a list of 319 projects closed during FFY 2013. The status of the final report is listed for each project.

**Table 4. 319 Projects Closed During FFY 2013**

Project	In Preparation	Final Report Status			
		In Review		Approved	
		DENR	EPA	DENR	EPA
Belle Fourche River Segment 5			X	X	
Brown County Segment 2				X	X
Grasslands Mgmt. & Planning Segment 3	X				
303d Planning and Assistance Segment 2		X			
Spring Creek Segment 1	X				
Vermillion Basin Segment 1				X	X

A historical list of Section 319 projects completed by DENR and its project partners is provided in Appendix B. The projects are listed alphabetically by river basin. Unless otherwise indicated, a final report for each project has been filed with EPA, entered in Grant Reporting and Tracking System (GRTS), and is available from the SD State Library. Several of the reports are also available by visiting:

<http://denr.sd.gov/dfta/wp/wqinfo.aspx#Project>

During 2013 DENR continued activities to close out all 319 grants awarded to the department by their current expiration dates. The 2009 grant is on target for being completed on time in 2014.

**See Appendix F:** for the final 2008 report

## 604(b) Grant

South Dakota had four 604(b) grants open during the FFY 2013 reporting period. The Section 604(b) project activities are detailed in Table 5.

**Table 5. 604(b) Projects Active in FFY 2013**

Grant #C6-99813110		
Projects	Grant (\$)	Status
Northern Great Plains Reference Site Validation & Bio-monitoring	\$76,500	Completed
White River TMDLs Project	\$24,500	Completed
	\$101,000	

<b>Grant #C6-99813111</b>		
Projects	Grant (\$)	Status
Brookings Area TMDL Sampling	\$25,000	Completed
Black Hills Stream Temperature TMDL (Battle Creek & others)	\$36,750	Completed
DENR Statewide Lake Survey (2011-2012)	\$8,750	Completed
DENR Administration/Travel	\$9,500	Completed
White River TMDL	\$20,000	Completed
	<u>\$100,000</u>	
<b>Grant #C6-99813112</b>		
Project	Grant (\$)	
Black Hills Stream Temperature TMDL (Battle Creek & others)	\$100,000	Completed
	<u>\$100,000</u>	
<b>Grant #C6-99813113</b>		
Projects	Grant (\$)	Status
Black Hills Stream Temperature TMDL (Battle Creek & others)	\$5,700	Completed
DENR Contractual – Misc. Water Quality Samples	\$5,400	On schedule
SDSU Cropland Planning for Water Quality improvement	\$23,900	On Schedule
Whitewood Creek & Bear Butte Creek Temperature TMDL – Phase 1	\$65,000	On Schedule
	<u>\$100,000</u>	

A historical listing of completed 604(b) funded projects is located in Appendix C.

### Section 106 Categorical Grant

South Dakota had three 106 Supplemental Categorical grants open during the FFY 2013 reporting period. The Section 106 project activities are detailed in Table 6.

**Table 6. Section 106 Categorical Grant Activities**

<b>Grant I-97886501</b>	
<b>1-Oct-10 through 30-Sep-2013</b>	
Project	Grant (\$)
DENR Stream Reference Site Development	\$36,464
EPA In-Kind for Lab Services	\$26,000
EPA In-Kind for Wetland Survey Field Work	\$78,000
Northern Glaciated Plains Ref. Site Validation & Bio Toolkit	\$46,336
Stage/Discharge Relationship Development	\$91,200
	<u>\$278,000</u>
<b>Grant I-97892801</b>	
<b>1-Jun-12 through 30-Sep-2014</b>	
Project	Grant (\$)
Beneficial Use Assessments	\$21,000

Cost Share USGS Gaging Stations	\$30,000
DENR National Lakes & Statewide Lake Surveys	\$250,000
EPA In-Kind for Lab Services	\$94,600
NWGP Reference Site Development	\$93,400
Stage/Discharge Relationship Development	\$28,200
	\$517,200
<b>Grant I-97893901</b>	
<b>1-Jan-13 through 31-Dec-15</b>	
Projects	
DENR NRSA and Reference Sites	\$139,648
EPA In-Kind for Lab Services	\$102,902
NWGP Reference Site Development	\$380,000
Sediment Diatom Analysis	\$12,750
Stage/Discharge Relationship Development (USGS)	\$30,000
Use Attainability Assessment	\$12,000
	\$677,300

A historical listing of completed Section 106 funded projects is located in Appendix D.

### Grants Reporting and Tracking System

South Dakota enters information about 319 funded projects into the EPA Grants Reporting and Tracking System (GRTS) database. The GRTS database contains information about project funding, goals, and tasks. During FFY 2013, DENR entered annual evaluations for all active projects. The reports detail project activities and progress for the period October 1, 2012 – September 30, 2013. The program can be accessed at:

<http://iaspub.epa.gov/pls/grts/f?p=110:199>

### Staff

During the reporting period, the Watershed Protection section was authorized 14 full time equivalents. Included in the number were twelve environmental scientists, one natural resources engineer, and one program administrator. Visit the Watershed Protection website for contact information, areas of program responsibility, and information about staff and support program goals.

<http://denr.sd.gov/dfta/wp/staff.aspx>

Watershed staff has access to the services of other Division of Financial and Technical Assistance and department media program staff as needed to carry out the mission of the Watershed Protection section.

Watershed staff provided funded projects with technical assistance and project oversight through onsite and electronic means during FFY 2013. They also assisted prospective project partners with the preparation of project proposals and

implementation plans. In FFY 2013 staff initiated 8 contracts obligating \$1,962,674 in federal funds and processed 125 payment requests for federal funds totaling \$2,458,037 from all sources; and initiated 5 contracts obligating \$615,000 in state and other funds and processed 35 payment requests totaling \$941,827 (total includes Clean Water State Revolving Fund NPS loans and water quality grants).

## **Training & Support**

Training was provided for department program staff, local watershed implementation and assessment project staff, and stakeholder groups. This training consisted of onsite project assistance, specialized training for monitoring and assessment, and coordinator workshops.

In addition to the training opportunities provided with direct involvement by the department, training is provided by 319 implementation project sponsors. Examples of training opportunities would be Volunteer Water Quality Monitoring, Managed Grazing Tours and Workshops, and Nutrient Management workshops.

## **Project Guidance & Oversight**

Watershed staff provides project management assistance to project sponsors during all phases of project development, implementation, and evaluation. The project guidance information and other documents are available at:

<http://denr.sd.gov/dfta/wp/319.aspx>

Program project officers are encouraged to complete at least two onsite visits to each assigned project each year. During FFY 2013, the reviews resulted in the revision of several project implementation plans and budgets and development of exit strategies for several projects prior to their expiration dates.

## **Information and Education**

The NPS Information and Education (I & E) Program is implemented through DENR's Watershed Protection Program. In FFY 2003, the decision was made to outsource the primary responsibility for the implementation of the statewide NPS I & E Program to the South Dakota Discovery Center. The Discovery Center was awarded a \$200,000 grant in FFY 2004 for that purpose. In FFY 2007, the Center was awarded \$200,000 in additional 319 funds to continue the project. In FFY 2010, they received \$300,000 for segment 3. In FFY 2013 the Center applied for \$370,000 for segment 4.

DENR maintains a close working relationship with the Discovery Center to ensure program milestones are met and to ensure that the program is widely advertised.

Additional outreach activities with which the department was involved during FFY 2013 are outlined below.

Dakota Water Watch is a system of trained citizen volunteers who take time each year to gather water quality information on lakes, streams, and wetlands in their area. This helps fill existing data gaps and helps to improve or maintain the water quality in eastern South Dakota. In FFY 2013 this program was expanded to the western part of the state.

Since 1992, South Dakota Water Festivals have delivered a strong water conservation message to an increasing number of fourth graders. Our goal is to provide a multi-topic, interdisciplinary, one-day water "science fair" where kids apply water education knowledge learned in the classroom to "real life" problem solving situations.

The Leopold Conservation Award program in South Dakota was started in 2010. It has several positive outcomes. First, it recognizes and celebrates extraordinary achievement in voluntary conservation by private landowners. Second, it inspires countless other landowners by example. Third, it provides a prominent platform by which agricultural community leaders are recognized as conservation ambassadors to citizens outside of agriculture. Finally, the program builds bridges between agriculture, government, environmental organizations, industry, and academia to advance the cause of private lands conservation.

In 2013 South Dakota participated for the first time in the Cannon Envirothon. The Cannon Envirothon is North America's largest high school environmental education competition. The goal is to develop in young people an understanding of the principles and practices of natural resource management and ecology and through practice dealing with complex resource management decisions.

In 2013 South Dakota selected the Skunk Creek Watershed for participation in Sand County Foundation's "Water As A Crop". This program is designed to demonstrate the vital connection between the health of working lands and the quality and reliability of water supplies. It creates partnerships to improve land and water quality, while fostering a mutual understanding about the value of good water stewardship.

### **Financial and Technical Assistance Provided by Project Partners**

While financial and technical assistance received from the Environmental Protection Agency provides the base for the South Dakota NPS Program, the resources available from public and private program partners are integral components of many program activities. Selected partnerships active during the past year are summarized below. For additional information about these and other program partnerships, consult the *South Dakota Watershed Project Funding and Technical Assistance Guide*. An electronic copy of the guide is available by visiting:

<http://denr.sd.gov/dfta/wp/documents/NPSFundingTechnicalAssistanceGuide.pdf>

### **USDA Natural Resources Conservation Service and Farm Service Agency**

The USDA Natural Resources Conservation Service (NRCS) and Farm Service Agency (FSA) are active project partners in nearly all phases of the NPS Program. Financial

assistance for NPS related activities provided by USDA administered programs during FFY 2013 is shown in Table 7.

**Table 7. SD NPS Related Activities Funded during FFY 2013 by USDA Programs**

<b>Program</b>	<b># Applications Funded</b>	<b>Acres</b>	<b>Funding (\$)</b>
Conservation Reserve Enhancement (CREP) *	168	18,638	\$319,000
Conservation Stewardship Program (CSP)	404	984,965	\$11,083,631
Environmental Quality Incentives (EQIP)	293	350,257	\$12,540,347
Grasslands Reserve Program (GRP)	5	18,866	\$4,173,713
National Water Quality Initiative (EQIP) **	14		\$537,405
Wetland Reserve Program (WRP)	54	4,869	\$10,488,020
Wildlife Habitat Incentives Program (WHIP)	175		\$4,354,075

\* The Conservation Reserve Enhancement Program (CREP) is administered by the USDA's Farm Service Agency. CREP is a "state-sponsored" Conservation Reserve Program designed for a specific geographic area that will address resource concerns identified by state partners.

The South Dakota CREP program was established in October 2009 and is managed by the South Dakota Game, Fish and Parks Department (GFP). The focus is on improving water quality, reducing soil erosion, and providing flood control all while creating additional pheasant nesting habitat in the James River Watershed. CREP participants will receive 40% higher rental rates than if they were to just enroll their land in the Conservation Reserve Program (CRP). Every acre enrolled in CREP will be open to public hunting and fishing.

\*\*The National Water Quality Initiative (NWQI) was new for FFY 2012. The Goal is to remove streams and other water-bodies from the 303d list, from threatened status, or from contributing to impairments. NWQI will assist producers to address high-priority water resource concerns in small watersheds. The State partnership selected four 12 digit Hydrologic Units in the Skunk Creek watershed which drains to the Big Sioux River. The significance's of this tributary is that it contributes pollutants that affect the City of Sioux Falls ability to address and achieve the TMDLs for the portion of the Big Sioux River that runs through the City.

### **US Geologic Survey**

The Geologic Survey provides technical assistance and water quality data to several South Dakota nonpoint source assessment and implementation projects, especially those that include large tracts of federal and tribal lands. The survey is also an active participant in planning and conducting the Eastern South Dakota Water Conference and the Black Hills South Dakota Hydrology Conference.

### **US Fish and Wildlife Service**

The US Fish and Wildlife Service (USFWS) provide technical and financial assistance to watershed projects for Best Management Practices (BMP) installation. This assistance centers primarily on cost share for practices related to managed grazing systems and

wetland habitat development. The main USFWS programs providing funds for BMPs are Partners for Fish and Wildlife Program and North American Waterfowl Conservation Act. Commonly cost shared BMPs include grass seeding, cross fencing, multiple purpose ponds, and riparian exclusion fencing.

**South Dakota BWNR/DENR Grant Assistance**

The Consolidated Water Facilities Construction Program (CWFCP) is administered by the South Dakota Board of Water and Natural Resources (BWNR). The program provides state grants and low interest loans for projects on the State Water Facilities Plan. NPS structural and construction BMPs such as animal waste management systems (AWMS) and shoreline stabilization are eligible for cost share funds through the program.

The BWNR also provides Water Quality grant assistance to watershed projects from the Clean Water State Revolving Fund (CWSRF) Administrative Surcharge Fees.

Projects awarded BWNR/DENR water quality grants during the reporting period are listed in Table 8.

**Table 8. NPS Projects Awarded State Grants during FFY 2013**

<b>Project</b>	<b>Funding Source</b>	<b>Grant Award (\$)</b>
Lewis & Clark Watershed Segment 3	Consolidated	\$200,000
Belle Fourche Watershed Segment 6	CWSRF WQ Grant	\$100,000
Lewis & Clark Watershed Segment 3	CWSRF WQ Grant	\$100,000
Grassland Management and Planning Segment 4	CWSRF WQ Grant	\$115,000
303d Watershed Planning & Assistance Segment 3	CWSRF WQ Grant	\$100,000
	<b>Total</b>	<b>\$615,000</b>

**South Dakota Clean Water State Revolving Fund (NPS Incentive Loan Program)**

The South Dakota Board of Water and Natural Resources administers the state’s Clean Water State Revolving Fund (CWSRF) loan program. In 2004, the board established a nonpoint source incentive rate for nonpoint source projects. Projects for traditional wastewater or storm water that include a nonpoint source component are eligible for the nonpoint source interest rate. The annual principal and interest payment is calculated for a loan at the current base SRF interest rates of 2.25 percent for loans with a term of 10 years or less, 3 percent for loans with a term of 11 to 20 years, and 3.25 percent for loans with a term greater than 20 years. Using the lower incentive interest rates of 1.25 percent, 2 percent, and 2.25 percent, respectively, a loan is sized using the annual payment previously calculated. The difference in the two loan principal amounts is the amount of funding available for the NPS component of the project.

Since its inception, five NPS project sponsors have used the NPS incentive program rate in partnership with municipalities. In FFY 2013, no new CWSRF NPS Incentive Loans were awarded. The NPS projects and loan amounts are shown in Table 9.

**Table 9. CWSRF NPS Loans**

<b>Project</b>	<b>Municipality</b>	<b>SRF Loan</b>
<b>FFY 2005</b>		
Brown County Water Quality Improvement Project	City of Aberdeen	\$ 1,156,259
Central Big Sioux Watershed Project - Segment I	City of Sioux Falls	\$ 4,374,985
<b>FFY 2006</b>		
Upper Big Sioux River Watershed Project –Segment IV	City of Watertown	\$ 113,985
<b>FFY 2007</b>		
Upper Big Sioux River Watershed Project – Segment V	City of Watertown	\$ 139,952
<b>FFY 2009</b>		
Firesteel Creek / Lake Mitchell Watershed Project	City of Mitchell	\$ 148,523
<b>FFY 2011</b>		
Central Big Sioux Watershed Project – Segment 2	City of Sioux Falls	\$ 1,901,014
Belle Fourche River Implementation Project – Segment 5	BF Irrigation District	\$ 200,000
<b>Total</b>		<b>\$ 8,034,718</b>

Aberdeen used the funding to reduce sediment and nutrient loadings to the Elm River. The Elm River is the primary source of the city’s drinking water supply. BMPs implemented include animal waste management systems, managed grazing, and shoreline stabilization.

Sioux Falls obtained the funds to install animal waste management systems, riparian buffers, and shoreline stabilization along the Big Sioux River and major tributaries within the city and north to the Moody County line. The buffers and animal waste systems will protect the city’s water supply by reducing fecal coliform and sediment loadings.

Watertown used the loan funds to reduce sediment and nutrient loadings to the Upper Big Sioux River, Lake Kampeska, and Pelican Lake.

Mitchell used the funds to reduce sedimentation in Lake Mitchell by implementing shoreline stabilization.

Belle Fourche Irrigation District obtained the funds to assist irrigators in converting from flood irrigation to sprinkler irrigation. Doing so will reduce the amount of return flows carrying sediment into the Belle Fourche River. This loan was provided as 100 percent principal forgiveness.

### **South Dakota Department of Agriculture**

The South Dakota Department of Agriculture (SDDA) provides state funds to conservation districts for the installation of conservation BMPs through the Conservation Grants Program. During this reporting period, SDDA awarded \$500,000 to conservation district projects. Many of these projects include NPS related activities.

### **South Dakota Department of Game, Fish, and Parks (GFP)**

The South Dakota Department of Game, Fish, and Parks (GFP) assistance programs accessed by projects are similar to those offered by the USFWS and center mainly on managed grazing and wetlands. For a description of the programs and practices cost shared, visit: <http://gfp.sd.gov/wildlife/private-land/default.aspx>

### 319 Grant Match

Nonfederal match of 40 percent of project expenditures is required for Section 319 grants. South Dakota takes a conservative approach to approving nonfederal match submitted by its project partners. As much of the match comes from the construction and implementation of BMPs, a large proportion of the match requirement for many projects is documented during the later phases of a project. See Appendix E for a summary of nonfederal match documented for each of the department's 319 grants.

### Water Quality Improvements

The South Dakota NPS Program considers quantification of load reductions and resultant water quality improvements essential to evaluating project goal attainment and reaching the TMDLs established for priority waterbodies. The quantification process uses a combination of modeling and water quality sample results. Commonly used models include Revised Universal Soil Loss Equation (RUSLE 2), Annualized Agricultural Nonpoint Source (AnnAGNPS), and Spreadsheet Tool for the Estimation of Pollutant Load (STEPL). DENR adopted STEPL as the primary load reduction estimation model for reporting annual and cumulative load reductions in GRTS in FFY 2007.

Annual load reductions/water quality improvements documented are entered in GRTS. Load reductions for waterbodies located in project areas during FFY 2013 were 487,018 pounds of nitrogen, 128,033 pounds of phosphorous, and 81,741 tons of sediment.

**Table 10. Load Reductions for Projects during FFY 2013**

<b>Project Name</b>	<b>Nitrogen (lbs. per year)</b>	<b>Phosphorus (lbs. per year)</b>	<b>Sediment (tons per year)</b>
Belle Fourche River Watershed Imp Segment 5	1,473	1,305	5,267
Belle Fourche River Watershed Imp Segment 6	735	630	1,600

## Appendix F

SOUTH DAKOTA NONPOINT SOURCE PROGRESS REPORT						
C9-99818508						
October 1, 2012 – September 30, 2013						
Cooperative Agreement Details						
<b>Cooperative Agreement: C9-99818508</b>						
Date of Award: March 15, 2008						
Expiration Date: September 30, 2013						
EPA Pass-Thru Amount: \$2,480,100.00						
EPA Total: \$3,160,100.00						
<b>Summary</b>						
A total of nine projects were originally(*) approved for funding through the FY2008 Cooperative Agreement (Table 1). Six of the nine projects were awarded \$1,521,500 in base funds and four of the nine projects received \$1,638,600 in incremental funding. The South Dakota Department of Environment and Natural Resources (DENR) is using \$680,000 of the base funding for staff and technical support.						
<b>Table 1. Summary of Section 319 projects approved for funding through the FY08 Cooperative Agreement.</b>						
GRTS Project Number	2008 Projects (Current as of October 2013)	Master Grant	Base	Incremental	Total	Status
	Staff & Support	FY08	\$680,000.00		\$680,000.00	Completed, all 2008 funds spent
1	303(d) Watershed Planning & Assistance Seg. 2	FY08	\$7,482.69	\$343,729.52	\$351,212.21	Completed Final Report Drafted
6	Upper James River Assessment Project	FY08	\$277,617.31		\$277,617.31	Completed final admin. rpt. approved
11	Belle Fourche Segment 3	FY06		\$610,000.00	\$610,000.00	Completed, final rpt. approved
10	Firesteel Creek/Lake Mitchell Watershed Imp. Seg. 2	FY07				Completed, funds deobligated to LJR 2, final report approved
7	Lower Big Sioux River Imp. Segment 1	FY08	\$44,308.94		\$44,308.94	Completed, final report approved
5	Lower James River Watershed Imp. Segment 1	FY08	\$60,000.00		\$60,000.00	Completed, final report approved
14	Upper Big Sioux River Watershed Imp. Seg. 5	FY08		\$500,000.00	\$500,000.00	Completed final report approved
12	Vermillion Basin Watershed Imp. Seg. 1	FY06	\$117,255.82		\$117,255.82	Completed final report approved
15	Lower Big Sioux Imp. Segment 2	FY10	\$73,750.89		\$73,750.89	Completed, final report approved
17	Lower James River Watershed Imp. Segment 2	FY09	\$136,900.00	\$13,100.00	\$150,000.00	Completed, final report approved
16	Lewis & Clark Watershed Imp. Segment - 2	FY09	\$47,935.24		\$47,935.24	Completed, final report approved
20	Lewis & Clark Watershed Imp. Segment - 3	FY11	\$75,000.00	\$171,770.48	\$246,770.48	On-Schedule, all 2008 funds spent
3	SD NPS Information & Education Segment - 3	FY10	\$1,249.11		\$1,249.11	On-Schedule, all 2008 funds spent
	Unobligated / Available					
	<b>Total</b>		\$1,521,500.00	\$1,638,600.00	\$3,160,100.00	
	<b>Pass Through Grants</b>		\$841,500.00	\$1,638,600.00	\$2,480,100.00	
	<b>Remaining to be Spent as of 10/01/2013: \$0.00</b>
